Schindler myPORT

Your personal elevator remote, key ring and video intercom in one app
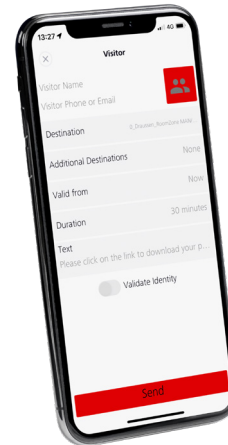

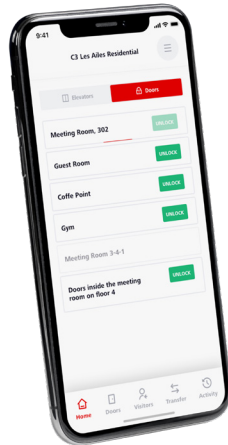

Schindler

Schindler myPORT
Maximum convenience for building tenants

Schindler myPORT is a cloud-based application that unlocks seamless user journeys throughout a building. Travel without interruption at entrances, elevators, and offices or apartments with a personalized menu of features for automated elevator calls, access credentials, and visitor management.

Elevator call

Call an elevator to a destination floor from a lobby, office, or apartment and receive an estimated time of arrival. Preselect destination floors and routes for automated elevator calls and journeys.

Access control

Define access rights for individuals or user groups, including temporary access, remote unlock features and more. Access features, rights, and customization can be maintained and shared by both administrator and user.

Visitor management

Enjoy security and convenience with personalized visitor access credentials for building entrances and elevator floor selection. Invitations are browser-based (SMS or email) with no additional download requirements for guests.

Touchless floor selection

Estimated time of arrival

Automatic elevator call

Automatic unlock

Remote unlock

Temporary keys

Invite guests (visitor ticket)

Video intercom

Send elevators to pick up guests
